Portfolio Website

Technical Skills

Frontend
React.js, AngularJS, Next.js, TypeScript, JavaScript, HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap

Backend
Node.js, Express.js, REST APIs, GraphQL

Database
MySQL, MongoDB

Tools & DevOps
Git, Jenkins, Keycloak, Jira, VS Code, Jasmine, Jest

Interests

Cricket, Football, Teaching

Professional Summary

Frontend Developer with 1+ year of experience building responsive web applications using React, Angular, and TypeScript. Skilled in REST API and GraphQL integration, implementing secure authentication workflows, and translating design mockups into production-ready UI components. Experienced collaborating with cross-functional teams to deliver scalable solutions with focus on code quality and performance optimization.

Work Experience

Frontend Developer | *Inadev*   *Dec 2024 – Present*

- Developing frontend modules for **Ceebit** and **Infin8** using AngularJS, React, TypeScript, and SCSS across 15+ screens
- Built 20+ reusable UI components for complex data-driven interfaces including multi-step forms and dashboards
- Implemented **RBAC** with Keycloak, managing authentication for 4 user roles with granular permissions
- Integrated REST APIs and GraphQL endpoints with **API orchestration layer**, reducing network calls by 25% and improving load times
- Collaborated with backend team to resolve 20+ integration issues, improving API response efficiency by 18%
- Converted Adobe XD and Figma designs into responsive components using Bootstrap and Tailwind CSS
- Wrote unit tests using Jasmine and Jest; supported Jenkins CI/CD deployments

Frontend Developer Intern | *CodeClouds*   *Aug 2024 – Nov 2024*

- Built **Ziosk**, a visitor tracking system using React, Redux, and Tailwind CSS with real-time updates
- Integrated 17+ REST endpoints with error handling and retry logic, reducing failed requests by 20%
- Translated Figma mockups into production components, delivering 10+ feature updates across sprint cycles
- Collaborated with team using Git workflows and Kanban boards for organized development

Projects

Infin8 – Mortgage Application
Angular, React, TypeScript, GraphQL, REST APIs

- Built UI components for mortgage workflows with RBAC implementation using Keycloak
- Integrated GraphQL queries for form validation and document management features

Ceebit – Low-Code Platform
AngularJS, Bootstrap, TypeScript, Jenkins CI/CD

- Developed reusable component library for multiple client projects
- Improved previous codebase through API orchestration, reducing redundant API calls

Ziosk – Visitor Tracking System
React, Redux, Tailwind CSS, REST APIs

- Built real-time visitor management dashboard with live updates and analytics
- Implemented error handling and retry mechanisms for API reliability

Cryptoride – Web3 Cab Booking
Next.js, Web3, MetaMask, Mapbox API, Sanity CMS

- Developed decentralized ride-sharing interface with blockchain payment integration
- Integrated Mapbox API for location tracking and route visualization
